THE LAMPRE GROUP

The Lampre Group is today at the forefront of European pre-coated steel production. Since 1975 Lampre has enjoyed continuous growth, and has invested heavily in highly advanced, computerised production machinery, to ensure that quality and reliability of our products remain the foundation of our success. Lampre has production facilities in Italy and Portugal, from where we service customers around the globe.

Lampre is now market leader in the segment of high quality

OUR PRODUCTS

Steel sheets and strips coated, on one or both sides, with:

- PVC film
- PPS film (PVC + PET)
- polyester paint up to 35µ
- co-laminate (paint + PET film).

Standard metal support

Hot-dip galvanized steel, cold-rolled steel, aluminium.

Dimensions

Thickness of the metal support:
from 0.3 mm to 2 mm.

Sheets: max. width 1500 mm.
max. length 5000 mm.

Strips: min. width 20 mm.
max. width 1500 mm.

Lampre pre-coated steel are used in a wide range of sectors and are designed to be subjected to a great many subsequent processes.

OUR SERVICES

The products offered by Lampre in the field of rolled steel sections are perfectly complimented by our two associated companies: Lamital and Lamfer are service centres specialised in the cutting and marketing of many steel products.

Rapid and careful service is guaranteed by their long experience, flexible structure, and by the synergic co-ordination of all the activities of the Group.

Treated sheeting

- Pickled steel
- Cold-rolled steel
- Aluminised steel
- Aluzinc steel
- Electro-galvanized steel
- Hot-dip galvanized steel
- Pre-painted steel

Dimensions

Thickness of metal support:
from 0.3 mm. to 3 mm.

Sheets: max. width 1500 mm.
max. length 5000 mm.

Strips: min. width 20 mm.
max. width 1500 mm.

LAMPRE IN SPORT

From the early 1990's Lampre has coupled its name with the world of professional cycle racing, sponsoring a well-known team valued at international level.

This choice was not random but determined by natural agreement between two operations that owe their success to the same fundamental elements: daily commitment, team work, planning and enthusiasm.

Over the course of the years a team of athletes who work well together and who have been able to excel in international events has thus been built up. Indeed the team has achieved increasingly important results, in a successful trend similar to that of the Lampre Group.

Cycling has proved to be an extremely effective form of communication for the Lampre Group for at least two reasons. On the one hand, the brand has become better known and the distinctive colours of the team now immediately bring the name

Lampre to the minds of cycling fans. On the other hand, the image of a dynamic company which, like its cycling team, achieves considerable results stage after stage with a correct competitive spirit, has been further confirmed.

- 1 - Gilberto Simoni wins the Tour of Italy 2001
- 2 - Maurizio Fondriest wins the Milano-Sanremo 1993
- 3 - Oscar Camenzind wins the Liège-Bastogne-Liège 2001
- 4 - Jan Svoboda wins the stage in Paris-Champs Elysées (Tour de France 2001)
