

# Manufacturer & supplier of marine interior systems

**Norac is a leading supplier of interior systems for cruise ships, ferries, commercial vessels and offshore installations. Headquartered in Norway, the company manufactures and distributes fire-rated walls, ceiling systems, doors, prefabricated wet units, floating floors, windows and furniture, making Norac a “one-stop shop” for high-quality, affordable interior systems for the maritime industry. Norac products are manufactured with only first-class materials in compliance with the most exacting rules and regulations and Norac’s own strict quality control measures.**

## Wall Systems

Norac designs wall systems designed to meet the following criteria: quality, flexibility, fire, sound, weight and ease of installation. Based on new requirements for improved acoustic insulation, Norac has developed a series of acoustic walls, which offer documented sound reduction properties of up to 54 dB RW.

## Ceiling Systems

Norac manufactures and supplies both suspended and self suspended ceiling solutions. The ceiling systems are recognized throughout the industry for both their superior acoustic properties and ease of installation. The self-suspended ceiling modules have been designed to avoid structural borne noise and to reduce safety risks associated with loose fire insulation.

## Doors

A complete range of doors – including ship-type internal A & B doors, external A-class and weather tight doors, and heavy-duty offshore doors of fire up to class H-120.

High sound reduction solutions available.

## Wet Units

Building on decades of experience and specialized competence, Norac offers fully fitted wet units. The Norac modular wet units are ideal for marine accommodations from cruise ships to offshore installations.

## Floating Floors

Norac manufactures and supplies floating floor systems designed for strength, safety, ease of installation and sound reduction properties. The floor system is constructed of galvanized steel cassettes of 3 mm thickness, but is easy to transport and install.

## Windows

Norac has developed fire-rated windows with fire class from B-30 up to H-90 in various sizes. The windows offer optimum safety and comfort with onsite-tested sound reduction of 60dB. Norac window systems include a telescopic internal frame for accurate and flexible installation.

## Furniture

Norac Marine Furniture (NMF) offers a flexible line of ship’s furniture for conventional ships and offshore living quarters. The furniture from NMF fulfills today’s requirements of quality, durability and user-friendliness.

## External walls

Norac is manufacturing specialized internal and external firewalls on behalf of and in co-operation with BD Systems, U.K.

BD Systems has developed a comprehensive range of fire/acoustic rated Internal Panelling and External Cladding systems for the outfitting and construction of accommodation units and production/drilling areas. These cover the full range of “C”, “B”, “A” and “H” class systems. They have been developed for high performance and durability in the harshest of offshore environments.
